## Alliance Rehabilitation of Connecticut

Serving senior-living facilities with customized rehab and fitness solutions that improve patient outcomes and streamline operations management.

Alliance Rehab of Connecticut offers a proprietary model for the delivery of rehabilitation and wellness services. Using best practices and advanced clinical programming, we help facilities to achieve measurably improved patient outcomes while assuring successful rehab operations.

Alliance Rehab of Connecticut brings the resources of highly professional and effective rehab and wellness programs to as many older adults as possible. In addition, Alliance Rehab of Connecticut offers a menu of options for individual senior-living facilities and service organizations. These options range from a comprehensive therapy services operation managed on an outsourced basis by Alliance Rehab of Connecticut to consulting services and other licensed resources that help a facility's own staff launch and manage this proven program.

Alliance Rehab of Connecticut specializes in helping senior care facilities serve the needs of older adults seeking to maintain maximum functional levels. We develop and manage programs that fulfill those needs appropriately, efficiently, and cost-effectively – and these same programs also address our client facilities' competitive and operational issues.

Alliance Rehab delivers customized programs with turnkey convenience and proven resources and staff. Find out more here – or contact Alliance Rehab of Connecticut Regional Director Richard Demarest by email [rdemarest@hranet.org](mailto:rdemarest@hranet.org) or by phone at (480) 510-0035.
